Global level measures														
Average degree	x										x			x
Maximal degree											x			
Average strength					x	x								
Average path length							x				x			
Density					x		x				x			
Diameter											x			
Node level measures														
Degree	x						x	x			x			x
Strength		x			x	x			x			x		
Betweenness centrality	x	x												x
Closeness centrality		x										x		x
Eigenvector centrality												x		
Clustering coefficient						x	x							
Other method														
Burst constaint														x
Disparity		x												
Cluster or Community detection			x									x		
Fitting of distributions	x								x		x			
Compare to random						x	x							
Information flow	x					x							x	
Interaction between age groups										x				
Ego network												x		
Robustness						x
